

Solar container training program and plan

Overview

This paper explores the process of developing a quality course, unit, or lesson and the instructional models and practices that can be used for solar education and training. Solar design and installation training prepares workers to properly design, install, and maintain these solar energy assets. Get trained as a solar professional at no cost - no prior experience required! Develop the skills you need to start your solar career with Installation Basics Training 200 (IBT 200), a 200-hour, five-week training course. Our online campus delivers expert-led training that fits your schedule - whether you're starting fresh, advancing your career, or adding solar skills to your trade.

Solar container training program and plan
