

# Supervision and inspection of chemical solar container power stations

## Overview

---

Sustainfy Energy offers comprehensive solar plant inspection services throughout the manufacturing and operational stages. In the field of PV plant operations, operations quality is determined by (1) the ratio of the amount of energy harvested to the potential amount of energy available for a particular plant and (2) plant equipment availability over time. While fees typically range between \$8-30/MWh, smart technology adoption and strategic partnerships can significantly optimize costs. Q: Are handling fees negotiable?

A: Yes, especially for long-term contracts or multi-site.
