

# The circuit breaker solar container motor makes a sound

- ☑ High energy density and long cycle life
- ☑ Modular structure

No need to replace the battery

Shorter charging time

Meets 99% EV car

## Overview

---

A buzzing sound from your circuit breaker often signals that electricity is flowing through the panel. On the graph, the green curve is what the inverter battery line current actually looks like. If it starts or stops while buzzing, then, it is usually that breaker or one adjacent to it. For two weeks there was a loud humming noise at 215 Hz in my house, day and night, coming from the roof top solar system.
