

Top surface solar container electrical equipment

Overview

A shipping container solar system is a modular, portable power station built inside a standard steel container. Off-grid living and clinics: Even homes and clinics have been built from shipping containers. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. We are proud to partner with one of the leading providers of factory installed solar options for shipping containers. Upgrade your shipping container home or office with a solar power kit and make the transition to off the grid living effortless! This system is designed to easily connect all your essential appliances (air-conditioners, computers, lights, microwaves and more). Whether you're managing a construction site, a mining operation, or an emergency.
