

Total installed capacity of power solar container in my country

Overview

Solar PV capacity additions, actual and forecast by country/region, 2015-2026 - Chart and data by the International Energy Agency. Data source: IRENA (2025) - Learn more about this data Total solar (on- and off-grid) electricity installed capacity, measured in gigawatts. Many countries and territories have installed significant solar power capacity into their electrical grids to supplement or provide an alternative to conventional energy sources. Solar power plants use one of two technologies: Photovoltaic (PV) systems use solar panels, either on rooftops or in. With 671 GW of prospective solar capacity, China alone represents nearly 35% of the global pipeline, more than the next five countries combined.

Total installed capacity of power solar container in my country

Global solar installations surge 64% in first half of 2025

World installed 380 GW of new solar capacity in first six months of 2025 Global solar installations are on track for another record year. In the first six months of 2025, the world added 380 ...

Renewable capacity statistics 2025

For most countries and technologies, the data reflects the capacity installed and connected at the end of the calendar year. Data has been obtained from various sources, including an IRENA questionnaire, ...

Solar power by country

The worldwide growth of photovoltaics is extremely dynamic and varies strongly by country. In April 2022, the total global solar power capacity reached 1 TW, increasing to 2 TW in 2024. The top ...

Solar electricity installed capacity , 2023

Official statistics by year of solar electricity installed capacity (GW). The values are presented in tables and charts with calculations of changes and shares, and with extensive

analytical functionality.

Solar PV capacity by country

In this section, we present statistical data on the solar photovoltaic capacity installed globally and in individual countries over the recent years. Here you can track how much solar PV generating ...

Solar Power by Country 2026

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

Global cumulative solar PV capacity forecast 2029, Statista

Global cumulative solar photovoltaic capacity has presented a trend of continuous growth in the last few years, which represents a gradual shift towards renewable and distributed ...
