

# Villa solar container battery is movable

## Overview

---

A mobile solar container with battery backup ensures that electricity is available 24/7. During the day, the panels charge the internal batteries; at night, the stored energy powers the site. The systems are expanding in application where diesel delivery is not feasible, and grid access does not exist. Proven for years by NASA and the military, Lithium Titanate batteries are now available for home energy storage! Lower your energy costs and reduce your dependence on the power grid with the award-winning energy storage system that provides more power, more safety, and the industry's longest.
